

Java Data Objects (JDO) Compliance

At the time this book was prepared, JDO was still undergoing changes. We did, however, receive some information on vendor's plans concerning JDO. This table, however, should not be seen as comprehensive at this time.

| | standard | JDO identity type | | | optional features | | | | |
|---------------------------|--------------|--|------------------------|-----------------------------------|----------------------------|-------------------------------|--------------------------------|----------------------------|--------------|
| | JDO features | application (primary key) identity | data store identity | non-data store JDO identity | optimistic transactions | non- transactional read | non- transactional write | transactional transient | retainValues |
