

Java Data Objects (JDO) Compliance

At the time this book was prepared, JDO was still undergoing changes. We did, however, receive some information on vendor's plans concerning JDO. This table, however, should not be seen as comprehensive at this time.

	standard JDO features	JDO identity type			optional features				
		application (primary key) identity	data store identity	non-data store JDO identity	optimistic transactions	non- transactional read	non- transactional write	transactional transient	retainValues
